EDUCATION

Lambda School, Remote — *Full-Stack Web Development*

May 2019 - present

Studied full-stack web development, computer science, and built real-life applications in an immersive online environment using tools such as Slack, Zoom, and Github to collaborate with other students around the world.

Liberty University, Lynchburg, VA — *B.S. Psychology*

August 2010 - May 2015

PROJECTS

Silent Auction

An app that provides a platform to connect buyers to sellers

Node | Express | PostgreSQL | React | Redux | Couldinary API | Heroku

- Developed a back-end API and database for a team of 3 front-end developers in under 4 days
- Implemented a multi-user authentication system

Cyberpunk MUD

A multi-user-dungeon application that provides interaction between players

Django | Python | PostgreSQL | React | Redux | Recharts | Heroku

- Developed a back-end API and database using an unfamiliar technology (Django) with a team of 3 web developers in under 4 days
- Created a room generation algorithm in Python that provides the front-end application with a plottable map
- Managed daily standups and kanban boards

EXPERIENCE

Lowcountry Pool House, Mt. Pleasant, S.C. — *Service Manager*

September 2017 - September 2019

Responsible for scheduling a team of pool technicians, ensuring team-members stay focused and on-track, answering client inquiries in a timely manner, scheduling service calls accordingly, and communicating with manufacturer representatives.

Liverpool Pool and Spa, Liverpool, N.Y. — *Lead Service Technician*

April 2013 - August 2017

Duties include the service and installation of swimming pool equipment. Skills include troubleshooting, diagnosing issues, communicating professionally with clients, and billing.

PROFICIENT IN
